

Movius Mobile Recording for MiFID II Compliance

MIFID II COMPLIANT MOBILE RECORDING SOLUTION

EU Markets in Financial Instruments Directive (MiFID II) requires that financial institutions record and store all communications “that may lead to a trade or investment,” including conversations and texts on mobile devices. Firms will need to implement a recording solution that is secure, cost-effective, easy to implement and scale, and that allows call and message recording on individual phone lines when required. Because of this, firms must ensure they have selected and implemented the right solution to comply with these new requirements and today’s legacy solutions require hardware, which prevent organizations from meeting all of these requirements.

HOW WILL THESE REGULATIONS CHALLENGE ENTERPRISE MOBILITY COMPLIANCE?

- ◇ Record Storage
- ◇ Explicit Consent
- ◇ Data Encryption & Privacy
- ◇ Auditable Call & Text Records

The Movius MultiLine solution delivers a secure business mobile number on your personal device, that is completely separated from any personal communications. This solution clearly separates personal and business calls and texts in a transparent and auditable way.

Even more, it is a cloud-based service that enables individuals and organizations to achieve MiFID II compliance for mobile recording, no matter who owns the device. The solution is carrier-agnostic and can be deployed at scale with built-in mobile recording without any change to the handset, the SIM or the user’s existing mobile network.

MultiLine provides enterprise-wide mobile recording for voice and SMS.

MultiLine Features & Benefits

- ◇ Manage business communications on a single device with separate contacts, call and SMS logs, voicemail, scheduling, and more.
- ◇ Provides a single solution for recording, encrypting, storing and retrieving business conversations.
- ◇ Enables compliance with MiFID II and FCA COBS 11.8, including the requirement to record mobile calls and texts, no matter whether the phone is corporate or privately owned.
- ◇ Ability to send all mobile call and SMS recordings to a customer location for storage and retrieval.
- ◇ Data storage is compliant with EU Data Protection regulations.
- ◇ Works seamlessly with leading enterprise mobility management (EMM) and MDM solutions to protect company data and information.

Conclusion

MultiLine is a cloud-based service that enables financial institutions to offer a separate corporate number on employee devices for calls and texts, delivering a complete BYOD enabled solution that makes complying with industry regulations easier than ever. It brings the compliance, retention, archiving and eDiscovery capabilities that banks require while easily capturing, recording, storing and analyzing mobile voice and text communications. For any size organization, this is a worry-free answer to the question of MiFID II compliance.

About Movius

Movius is the leading global provider in cloud-based secure mobile communications software, helping enterprises deliver better engagement for their clients. Enterprises around the world use the company's all-in-one mobility platform to connect with their customers in more convenient, cost-effective and compliant ways. The platform offers an easy way to extend and integrate voice, text, and messaging services into other systems, like CRM or collaboration tools.

Headquartered in Atlanta, Movius has additional locations in Silicon Valley, Calif., and Bangalore, India. Movius works with leading global partners like Sprint, BlackBerry, Telstra, and Telefónica.
